

IMPACTIVA LEAN TRANSFORMATION PROGRAM

FROM LOW PRODUCTIVITY TO LONG LEAD-TIMES, WASTE CAN PUT YOUR GLOBAL SUPPLY CHAIN AT RISK

Waste destroys profits. Excess labor, work-in-process inventory, manufacturing lead-time, floor space, all can dramatically reduce the margins of factories, trading companies and brand owners. With costs continuing to rise each day, doing more with less is no longer an option, it's essential. There is considerable room for improvement, and at Impactiva, we can help. As an example, Asian footwear factories only produce 3 – 4 pairs per operator per day while well run factories in the US or UK in the early 2000's achieved 17 – 18 pairs per operator per day. Our Lean specialists will work with you to design, establish and implement a Lean production system at your factories that eliminates waste while increasing quality, productivity, on-time delivery, flexibility, and manufacturing capacity with a minimum of 200% return on your investment in Impactiva's fees.

WHY IS IMPACTIVA DIFFERENT?

TAILORED PROGRAM TO SATISFY STRATEGIC OPERATING GOALS

Our approach is comprehensive and customized. Following initial meetings to establish and sync your strategic operating and Lean goals, we'll perform a detailed, two-day Lean Excellence Assessment to rate each supplier site. Then we'll gather data, assess opportunities for improvement, clean and organize all major factory work stations, implement managing for daily improvement and identify-implement improvement projects. And through it all, we'll provide detailed monthly reports of waste eliminated and savings achieved.

SIGNIFICANT, SUSTAINABLE IMPROVEMENTS

A Lean Transformation Program is only useful if it can be sustained. That's why we developed a 24-hour Lean Transformation Learning Program and 44-hour Change Leadership Coaching Program to ensure that factory owners, top managers and senior supervisors fully understand the Lean tools and goals, as well as their responsibilities. These programs, combined with our one-on-one training of a process engineer at each supplier site, will ensure ongoing efficiency for many years.

INDUSTRY-LEADING LEAN SPECIALISTS

Your highly trained Impactiva Lean Team will include Lean consultants, a Lean transformation facilitator and a change leadership coach. But that's not what makes them different. As employees of Impactiva, the world's leading quality assurance provider to the leather, footwear, apparel and other lifestyle industries, they'll also provide the industry insight needed to maximize efficiencies and more quickly achieve your strategic operating goals.

Impactiva's Lean Transformation Program will provide sustained optimization of your supply chain by eliminating waste thereby increasing quality, productivity, flexibility, and manufacturing capacity.
